Managing Complex ERP Environments to Reduce Costs and Improve IT Operations

call (480) 315-3000, or visit us on the web at www.OneNeck.com

OneNeck helps customers host, manage, upgrade and maintain Oracle eBusiness Suite applications. We leverage these applications to improve business processes, reduce costs and provide better support for management decision-making.

OneNeck Ranked No. 1
ERP Management Outsourcer
by the Black Book of Outsourcing
Three Years in a Row!

With unmatched expertise, proven experience and excellent customer references, we're well qualified to manage your Oracle environment. In fact, OneNeck offers:

- End-to-End Oracle 11i/12 hosting, administration, technical and functional support
- Innovative solutions including "SaaS-like" model and "Fusion Insurance"
- Certified, world-class Application DBAs and technical resources

Since 1997, customers have relied on OneNeck for their tactical and strategic IT initiatives. Our track record in ERP systems management translates into meaningful benefits for companies. Through this experience, we're able to help companies worried by the Oracle-led wave of consolidation in the enterprise software market. With significant in-house resources as well as depth of experience, OneNeck can mitigate the serious concerns customers may have regarding the future of their investments, systems support, updates and migration paths.

In addition to the application layer challenges, companies must pay special attention to the middle tier and the potential benefits of the SOA architecture. This aspect is especially critical for acquisitive companies running a portfolio of applications with complex integration requirements.

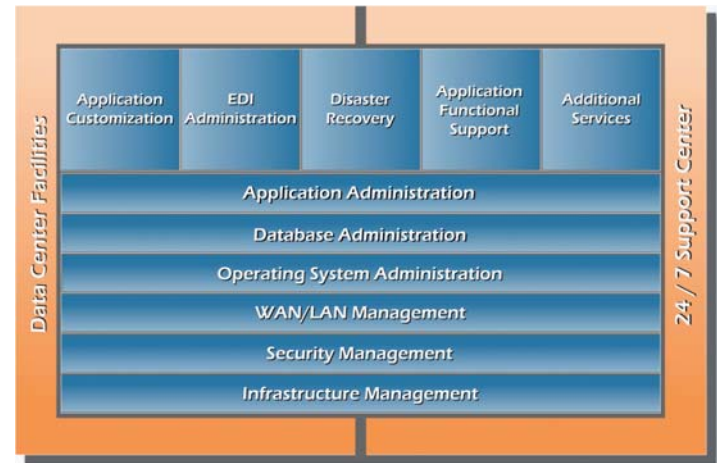

OneNeck's partnership with Oracle Corporation, as well as bolt-on solutions providers of Compliance, Document Management,

Workflow Management, and Archiving systems, allows us to provide a complete, flexible and customized solution. Through a robust delivery model, we enable companies to maintain complex Oracle ERP environments on a cost-effective and predictable basis.

Plus, we've developed an "out of the box" decision tree model that can assist our customers in selecting the best Fusion migration path. Using our ROI-based model, we deliver the most business value while minimizing the migration risk.

ONENECK'S ORACLE SOLUTIONS

We provide a variety of Oracle solutions that deliver maximum value to our customers' e-Business Suite environments. These solutions include:

"We were looking for a long-term, reliable partner that could support our complex application environment. OneNeck brought a unique blend of Oracle application and Utility industry expertise to the table. Plus, their project management skills and rigorous support processes help us maintain peak system performance."

Michael Eaton
Vice President of IT
Maine Public Service Company

...continued

In addition, OneNeck completes a stringent and comprehensive third-party examination each year for our SAS 70 Type II certification. This certification ensures specific control objectives are appropriately designed and functioning.

“Our business demands consistent and agile IT support to operate in our industry. We expect our sourcing approach with OneNeck and our other key vendors to deliver significant value to our businesses while providing a cost-effective, predictable solution to leverage our ERP system. By engaging OneNeck to manage our Oracle ERP application, we can draw attention to our strategic IT initiatives and business processes rather than focus on building an internal Oracle competency.”

Tom Gallagher
Chief Financial Officer
Isolatek International
