

Office 365 Migration Services

Migrations can be complex. Don't go at it alone. OneNeck offers comprehensive migration services to help your organization transition to Microsoft Office 365 with minimal disruptions.

Our Approach

Relying on our extensive Microsoft experience and expertise, we guide our customers through the entire migration process and ensure that the migrated solution functions appropriately and meets their collaboration expectations.

- **Assess:** We begin all Office 365 migrations by assessing your business and application needs. This step could include a high-level discussion or a deeper discovery with our experienced migration engineers to review your environment.
- **Plan:** Next, our migration engineers work with you to design your Office 365 road-map and develop the right Office 365 migration plan. We use our years of migration knowledge to create your plan, minimizing downtime and ensuring a great end user experience.
- **Migrate & Configure:** We combine industry leading-practices, services, tools, knowledge of past migration, and highly skilled experts to migrate and configure your Office 365 deployment. Feel confident with your migration knowing that we have the skills and expertise to work through any unique circumstances.
- **Support:** After migrating, we include a post migration scheduled resource for expert to expert support. This resource helps provide quick access to a skilled engineer that can help resolve any clean-up items that may be encountered after a migration. Having a resource dedicated to you, post migration, shortens your time to resolution.
- **Optimize:** Migrating to Office 365 doesn't mean your world stops evolving. In fact, Microsoft is continuously creating new features and security options within their cloud solutions. OneNeck is your trusted partner to help you take advantages of these enhancements and optimize your Office 365 environment.

OneNeck, Your Trusted Partner

As a Microsoft Gold Certified and Microsoft Cloud Solution Provider partner with extensive deployment experience and deep technical knowledge of Microsoft products, we can support and streamline your Office 365 migration. Our goal is to ensure you meet your strategic business initiatives all while increasing efficiency and overall productivity.
