

Scott Gorden
Director of Enterprise Hybrid IT

Areas of expertise:

- Hybrid IT discussions with state and local governments;
- Colocation services
- Hardware resale and OEM relationships
- Advanced Services
- Contracts and negotiations

As the director of Enterprise Hybrid IT, Scott Gorden is responsible for delivering a first-rate customer experience, which begins with helping clients identify the right IT solution. He is responsible for developing and maintaining relationships with clients and vendors across the Midwest. In addition, Scott maintains accountability for ensuring top-quality service levels.

Scott leads a seasoned team of employees with deep technical and service expertise. Under Scott's direction, the team provides superior customer service. They are dedicated to working closely with clients to design, procure, implement, manage/operate and optimize mission-critical IT solutions. Depending on the client's needs, the solutions vary from on-premises to colocated in a OneNeck continuously maintainable data center, leveraging our ReliaCloud IaaS/PaaS platform or a hybrid of these options. Scott's mission is to help customers balance complex IT needs with budget and risk tolerance.

Scott maintains professional and technical knowledge by attending educational workshops, reviewing professional publications, establishing personal networks and participating in numerous professional societies. Prior to joining OneNeck in 2002, Scott was the Client Relations manager for a large technical training company in Des Moines, Iowa.

Scott attended Des Moines Area Community College and Iowa State University. He resides in Iowa and is a passionate instrument-rated pilot.
