

# Advanced Services

Expert help guiding you through today's digital transformation

## When your workloads are high and your deadlines are tight, turn to a partner you can count on.

As your business becomes more complex and the pace of digital change continues to increase, the role of technology in your organization is more critical than ever before. The OneNeck® IT Solutions team of experts can provide real value on projects ranging from technology deployments to full ecosystem design, implementation and management. We will provide you with independent, unbiased evaluations and recommendations with an eye toward future-proofing to ensure the technology you implement today doesn't limit your organization tomorrow.

### Experienced in Partnering

From network upgrades and expansions to complete system deployments, OneNeck can help you with the discovery, planning, design, implementation and management of your hybrid IT solutions. With hundreds of IT projects under our belt in almost every industry, our subject matter experts make sure you have access to the latest technology and knowledge across your entire environment.

Our services range from a complete ecosystem design and implementation to the strategic deployment of new technology within an existing environment. We work with you to evaluate options, after which we provide a recommendation for a path forward. We'll work together to create the architecture, technology plan, implementation strategy and ongoing support that leads to successful projects and efficient operations. Our services span...

### Applications

Businesses rely on a variety of applications to support and improve their productivity. Our Advanced Services team can help you assess, migrate, upgrade and/or secure your application environment to ensure they are running at peak performance and supporting your business

In addition, OneNeck can help you enable secure and remote access to specific applications via application virtualization, allowing you to optimize productivity while also providing access to applications from any device, anywhere.

### Cloud

More than ever, companies are looking for efficient, flexible and scalable cloud solutions that will reduce complexity and cost, while enabling rapid application growth and new technologies. Our Advanced Services team can help by assessing your cloud readiness, and then design a solution that is the perfect mix of cloud for your needs, whether that's public, private or a hybrid mix of cloud. We can help securely migrate your data to the cloud and then manage it so you can ensure the high availability, scalability and comprehensive security of your critical data. Our cloud solutions include:

- On-premises or Colocated Private Cloud
- Hosted Private Cloud (OneNeck's ReliaCloud®)
- Public Cloud (Managed Microsoft Azure)
- Hybrid Cloud

### Collaboration

Effective collaboration is critical in a modern world where employees are geographically dispersed, travel and budgets have been reduced, and information overload is considered normal. We can help design your communications roadmap and deploy your solution to ensure business agility and productivity while keeping your employees happy. Our comprehensive collaboration solutions include:

- Unified Communications
- Video
- Workspace
- Messaging
- Conferencing
- Contact Center
- Digital Media

## Data Center

Thinking of your data center infrastructure as a set of integrated parts that must function seamlessly together is now the expectation. If you're installing a new data center, updating an existing one, or looking for a data center provider, our experience in IT infrastructure deployments can help you optimize system usage, access and security while reducing HVAC, electrical and cabling costs. Our services include:

- Converged Infrastructure
- Compute and Storage
- Virtualization
- Applications and O/S
- Cloud and Automation
- Data Center Network
- Backup and Archive
- Application Delivery

## Enterprise Networking

Enterprise networks provide the connectivity essential for every organization. With hybrid IT and cloud solutions, the enterprise network is more critical and more complex than ever. OneNeck's Advanced Services team can help you take advantage of end-to-end network services including network infrastructure consulting and design, implementation, and operations and maintenance services for any size organization. We design, install and support networks that are secure, scalable and upgradeable using wired and wireless technologies that are tailored specifically for your business. Our services include:

- Data Center Network
- Campus Network
- WAN and VPN
- Application Delivery
- Wireless
- Optical

## Security

Today's businesses must consider threats from smartphones, tablets and consumerization of IT, combined with telecommuters, contractors, partners and business-critical services hosted in the cloud. Security is more important than ever—and far more complex. Our Advanced Services team can help you determine your unique security risks and develop a plan to address those risks and defend your network. We're highly certified and well versed in today's leading security technologies, allowing us to employ the right strategies for your organization. Our services include:

- Network Security
- Application Security
- Data Center Security
- Identity and Secure Access
- SIEM
- EMM/MDM

Our projects are well-structured and managed, yet can be highly customized. Our proven service methodologies and technical frameworks provide the foundation to promote alignment with industry standards and your specific business objectives.

Our Advanced Services team is committed to providing you with independent, unbiased evaluations and recommendations, with an eye toward future-proofing to ensure the technology you implement today doesn't limit your organization tomorrow.
