

Fast Track Virtual CISO Services

The threat landscape is booming . Don't wait until it's too late.

With all the moving pieces in today's technology landscape, new security threats continue to emerge. Today's enterprise is faced with the constant threat of attack, and there is no end to the onslaught.

Yet security expertise is hard to come by and more in demand than ever before. At OneNeck® IT Solutions, we believe this makes partnering with a trusted IT security services provider a crucial business decision.

The Pressure is Mounting

The role of a Chief Information Security Officer (CISO) has grown in importance as catastrophic breaches are impacting businesses on a daily basis. The 2017 Ponemon Institute Data Breach Study concluded that the average consolidated total cost of a data breach is \$3.62 million, and the country with the highest cost, both per record and incident, is the US.

But not every organization can afford to have a full-time CISO, which means that the responsibility of keeping the business

safe from attack falls on often overworked IT teams who are trying to meet the growing demands of the business. New technologies like cloud and the Internet of Things (IoT) have also added increased complexity and demands on IT, further opening the door for breaches. Not to mention that as cybersecurity threats continue to evolve, security skillsets need to as well, making it difficult for IT teams to keep up.

The lack of time and resources required to stay informed of the latest cyberthreats, and develop and implement a strategic security strategy is a real issue for many organizations, leaving them as prime targets for malicious threats. The good news is that there are options outside of hiring a full-time CISO.

OneNeck's vCISO Services

While security based on standards and regulatory requirements is better than nothing, at OneNeck, we understand that every organization has a unique risk portfolio and tolerance that their security program must be built around if it is to be successful at protecting their organization and agile enough to support business operations. Our cost-effective Fast Track Virtual CISO (vCISO) service is available to help you address the scope of security and compliance needs that

Conquering Mounting Security Threats Anywhere.

Protect your business with a security strategy that keeps your users, data and applications safe, while securely enabling your workforce productivity and meeting growing customer demands.

The OneNeck Difference:

The cookie-cutter approach to security does not work. So, choose a partner that knows your unique environment needs unique security solutions. Utilize our expertise in cybersecurity mitigation and security program development, and we'll develop a security program that's a perfect fit for you.

Leverage Our Experts

Is it worth the risk going it alone? Benefit from our team of security experts that know how to build and manage security programs.

Make Executive Alignment Real

Our experts make it easy to work with organizational leaders to select the right tools and technology that fits your needs. In addition, they can help evangelize effective security controls to the broader organization.

Have Confidence in Your Strategy

We help drive measurable improvement in your security strategy. We'll deliver detailed documentation to help support your security strategy, including recommendations for remediation, roadmaps for future-proofing and guidance every step of the way.

today's businesses face. We have in-depth knowledge and experience in assisting our customers with their security challenges, and our team is made up of security experts who stay current on emerging threats, so you don't have to.

Over a 3-month span, our team of security experts will:

- **Security Assessment** - Perform a standards-based security assessment to discover existing security posture.
- **Gap Analysis** - Perform a gap analysis with product evaluation report for technical exposures.
- **Remediation Plan** - Create a corrective action plan for mitigating exposures prioritized by risk impact and likelihood.

Then, should you choose to engage us to do so, OneNeck's security team can also provide additional remediation services, giving you the confidence you need knowing that your security strategy is executed by experts with deep understanding of your unique environment.

Don't Go It Alone

When you are understaffed and unsure if your organization is truly secure from today's growing cyberattacks, OneNeck's vCISO service offers you extensive cybersecurity expertise. We'll guide you in identifying the gaps, and then provide remediation direction and a security roadmap to face the future with confidence.
